PROFESSIONAL HIGHLIGHTS

- Completed three internships across Business Analysis and Accounts & Finance, gaining practical experience in business processes and client-based tasks.
- Got involved in live client projects wherein I have helped with requirement gathering, BRD/FRD development, creating user stories, working with stakeholders, and User Acceptance Testing (UAT).
- Using generative AI tools to analyze requirements, identify gaps, explore solution approaches, generate workflows, develop initial prototypes/mockups, and support functional documentation.
- Worked effectively in an Agile environment by collaborating with other cross-functional teams.
